OLD BUSINESS:

Special Use Application for Borrego Solar Project 2668 Swett Road, Lyndonville. Erdman Anthony has responded to MRB's letter dated 4/5/2022 on 4/26/2022. Erdman Anthony and MRB have been working closely together to address the MRB comments. We are in receipt of the combined wetlands application and the SWPPP. At this time MRB suggested that if the planning board wanted to move forward, he was comfortable with where the project was at currently. The Planning Board asked for clarification of #5 on the comment/response. The next move would be to Designate the Town of Ridgeway Planning Board as the lead agency for SEQR. Chairman Fenton called for a resolution Designating the Town of Ridgeway Planning Board as Lead Agency.

 - c. In accordance with the criteria of the Town Code the proposed Project is accessible to emergency vehicles and personnel, all support structures and devices are non-reflective or painted a drab color, the information provided demonstrates that the system shall not reflect solar rays onto neighboring properties, public roads, or public parks, artificial lighting is shielded and limited to safety purposes only.
 - d. The Site Plan meets all requirements of the Town Zoning Code, including providing for necessary landscaping and screening.

e. As noted in the environmental review, the development of the Project will not have a significant adverse impact on fish, wildlife, or plant species or their habitat or other significant habitats identified by local, state or federal agencies.

f. The proposed special use is consistent with the general intent of the Town's Comprehensive Plan and with each of the specific purposes set forth in the Town Zoning Code.

g. The location, size and use of the structures involved, nature and intensity of the operations involved and size and layout of the site in relation to the proposed special use are such that it will be compatible with the orderly development of the zoning district.

h. Operation of the proposed special use is no more objectionable to the uses of nearby properties, by reason of dust or smoke emission, noise, odors, fumes, pollution of air or water, including subsurface waters, unsightliness or similar conditions, than would be the operation of any permitted use.

i. The proposed special use satisfies each and all standards and conditions specified for such special use (utility-scale solar) by the relevant provisions of the Special Use Permit Article of the Town Zoning Code.

j. In making its determination on the Site Plan for the proposed Project, the Planning Board has considered the General Criteria listed in section 1105 of the Town Zoning Code, to the extent each item is considered appropriate. In addition to the determinations made within the determination of environmental significance, and those referenced in these Findings, the Board notes that it has reviewed the adequacy of storm-water and drainage facilities, and finds that they are in compliance with the requirements of the Code, reviewed the adequacy, type and arrangement of trees, shrubs and other landscaping constituting a visual and/or noise buffer between the applicant's and adjoining lands, including the maximum feasible retention of existing vegetation, considered the protection of adjacent or neighboring properties against noise, glare, unsightliness or nuisances, the adequacy of fire lanes and other emergency zones and the provision of fire hydrant.

Solar Energy Project, dated April 26, 2022 and any subsequent revisions requested on behalf of the Town Engineer. No permits shall be issued until the NYSDEC Acknowledgement letter has been received by the Town Building & Zoning Department.
- f. Prior to obtaining a building permit, the Applicant must provide an irrevocable financial security bond (or other form of surety acceptable to the Town of Ridgeway at its discretion) for the removal of the Solar Energy System, with the Town of Ridgeway as the designated assignee/beneficiary, in the amount approved by the Planning Board in the Decommissioning Plan.
- g. The Decommissioning bond or surety shall provide for an annual increase in the amount of the surety to compensate for the cost of inflation or any other anticipated increase in costs of removal, or a mechanism for a licensed engineer retained by the Applicant to submit a revised estimate every three years for approval by the Planning Board.
- h. The owner/operator is responsible for maintaining and replacement of all trees and landscaping as depicted on the approved site plans for the life of the project. All identified trees and landscaping in need of replacement are to be replaced by the following growing season. Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only (If applicable)

Project: 2888 Swett Road Solar Farm

Date: May 4, 2022

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact.
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The Planning Board, as the designated lead agency for this Action, under the provisions of Part 817 of the State Environmental Quality Review Regulations, has given a thorough and comprehensive evaluation of the impacts likely to result from the proposed Action. Based upon this evaluation, the Planning Board, in a separate resolution adopted on Wednesday, May 4, 2022 has determined the proposed Action will not likely result in a significant adverse impact upon the environment and that a Negative Declaration is issued.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information
EAF Supporting Information and project maps

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Ridgeway Planning Board _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
